# Platform Economics and Online Marketplaces

## Module 3, AY 2021-2022

### Course Information

---

Instructor: Chuang Tang (Assistant Professor)

Office: PHBS Building, Room 708

Email: [chuang.tang@phbs.pku.edu.cn](mailto:chuang.tang@phbs.pku.edu.cn)

Office Hour: TBA

### 1. Course Description

#### 1.1 Context

##### Course overview:

The last decade has witnessed a meteoric rise in the number of online markets and platforms competing with traditional mechanisms of trade. Examples of such markets include online marketplaces for goods, such as eBay; online dating markets; markets for shared resources, such as Lyft, Uber, and Airbnb; and online labor markets. The exploding opportunities for employment and research in these areas therefore require students to have an exposure to the intersection between the technical possibilities that are opening and the ways in which they can create economic value. This course aims to plunge students into this platform economy by offering both a crash course in the key tools from economics, marketing, operation management and other disciplines that are being used to design and analyze online marketplaces, and exposing students to a range of concrete and topical practical problems in the area. The overarching aim is to prepare students for careers and/or dissertations in this field. In the first part of this course, we will cover the basic concepts and principles of platform economics from both theoretical and empirical perspectives. In the second part, we will specifically discuss and analyze some important online marketplaces.

##### Prerequisites:

Microeconomics

#### 1.2 Textbooks and Reading Materials

No required textbook.

The following books will be major references.

- *Matchmakers: The New Economics of Multisided Platforms* by David S. EVANS, Richard SCHLAMMANSEE, Harvard Business Review Press, 2016.
- *Platform Revolution* by Geoffrey G. PARKER, Marshall W. Van ALSTYNE, Sangeet P. CHOUDARY, W. W. Norton & Company, 2016.

## 2. Learning Outcomes

### 2.1 Intended Learning Outcomes

Learning Goals	Objectives	Assessment (YES with details or NO)
1. Our graduates will be effective communicators.	1.1. Our students will produce quality business and research-oriented documents.	Yes. group project
	1.2. Students are able to professionally present their ideas and also logically explain and defend their argument.	Yes.
2. Our graduates will be skilled in team work and leadership.	2.1. Students will be able to lead and participate in group for projects, discussion, and presentation.	Yes. Group project
	2.2. Students will be able to apply leadership theories and related skills.	No.
3. Our graduates will be trained in ethics.	3.1. In a case setting, students will use appropriate techniques to analyze business problems and identify the ethical aspects, provide a solution and defend it.	Yes.
	3.2. Our students will practice ethics in the duration of the program.	Yes
4. Our graduates will have a global perspective.	4.1. Students will have an international exposure.	Yes.
5. Our graduates will be skilled in problem-solving and critical	5.1. Our students will have a good understanding of fundamental theories in their fields.	Yes.

thinking.	5.2. Our students will be prepared to face problems in various business settings and find solutions.	Yes.
	5.3. Our students will demonstrate competency in critical thinking.	Yes.

## 2.2 Course specific objectives

This course is designed to help students develop: (1) A working knowledge of the current platform economics and strategic goals of different platforms; (2) A conceptual understanding of analytics process about those platforms to enable designing analytics plans, collaborating with data scientists, and applying skills in novel contexts.

## 2.3 Assessment/Grading Details

Participation	15%
Homework	20%
Group project	20%
Final exam	45%

### A. Class Participation

You are expected to attend each class **on time**. You are also expected to read the text materials and **contribute to class discussion** by both listening carefully to your classmates and speaking out your own viewpoints. Learning depends heavily upon thorough and lively participation. Naturally, there are students who do not feel comfortable contributing verbally in the classroom. We should all try to make the classroom atmosphere as congenial as possible to assist all of us in the class participation process. This does not, however, mean that you must agree with every comment offered by your classmates (i.e., it's ok to disagree).

### B. Homework

Throughout the course, you will be given several hands-on exercises. Each student should submit his/her own answer sheet in hard-copy. I prefer the solutions to be concise, precise, and typed. Late assignment: If you hand in your solutions one day late, you will get 75% of the full original marks; if you hand in by two days late, you can only get 50% of it, and so on.

### C. Group Project

In this group project, you need to find an important and valuable problem encountered by a platform-based company. Based on what we learn in the class, you need to analyse the problem and propose a solution to the problem. You may need to collect more data or conduct literature review to defend your solution and augment your argument.

#### **D. Final Exam**

The final exam will focus on your understanding of the course materials.

### **2.4 Academic Honesty and Plagiarism**

It is important for a student's effort and credit to be recognized through class assessment. Credits earned for a student work due to efforts done by others are clearly unfair. Deliberate dishonesty is considered academic misconducts, which include plagiarism; cheating on assignments or examinations; engaging in unauthorized collaboration on academic work; taking, acquiring, or using test materials without faculty permission; submitting false or incomplete records of academic achievement; acting alone or in cooperation with another to falsify records or to obtain dishonestly grades, honors, awards, or professional endorsement; or altering, forging, or misusing a University academic record; or fabricating or falsifying of data, research procedures, or data analysis.

All assessments are subject to academic misconduct check. Misconduct check may include reproducing the assessment, providing a copy to another member of faculty, and/or communicate a copy of this assignment to the PHBS Discipline Committee. A suspected plagiarized document/assignment submitted to a plagiarism checking service may be kept in its database for future reference purpose.

Where violation is suspected, penalties will be implemented. The penalties for academic misconduct may include: deduction of honour points, a mark of zero on the assessment, a fail grade for the whole course, and reference of the matter to the Peking University Registrar.

For more information of plagiarism, please refer to *PHBS Student Handbook*.

### **3. Topics, Teaching and Assessment Schedule**

Week	Content
------	---------

1	Introduction, Network Effect
2	Platform Pricing
3	Platform Competition
4	Search Behavior
5	Search Engine
6	Online Reputation
7	Position Auction
8	Sharing Economy
9	Presentation
