Email: wangyc@phbs.pku.edu.cn

Office Hour: **Tue 3:30-5:30 pm or by appointment**

Teaching Assistant: TBA

Phone:

Email:

Classes:

Lectures: **Tue & Fri 8:30-10:20**

Venue: PHBS Building, Room TBA

Course Website:

If any.

1. Course Description

1.1 Context

Course overview:

The main purpose for this elective course includes:

(1) Students will be exposed to various topics related to household finance and financial markets, including using different methodologies and different applications in China and in the US.

(2) At the end of the day, I hope students will be familiar with frontier research topics and different methodologies, and are ready to explore new and different topics related to household finance. Students are expected to be able to start their own research ideas/projects with some specific, narrowed-down topic related to household finance, and I hope this course can help. As a quite standard requirement, students are expected to read papers, discuss, and present papers in class.

In particular, this course will examine households' important financial decisions under different environments. We mostly focus on empirical studies. Topics will include: (1) Households' consumption and saving with uncertainty, with financial market frictions and credit market imperfections (Lectures including Introduction of basic economic theory, Classical Empirical studies and applications on this topic, and also Empirical studies on Chinese Households); (2) Households' decisions of entry into entrepreneurship, starting up new businesses and investing in young firms, with different backgrounds and possible financial market frictions (Empirical applications and studies for related topics from different countries, China empirical applications for households' entrepreneurship; and Quantitative theory as well); (3) Asset market participation and Households' financial portfolio choices in a variety of environments, with

different risk preferences, different background risks, different degree of credit market frictions (Mostly Empirical studies).

Prerequisites:

Intermediate-level knowledge in Macroeconomics (e.g. Macroeconomics by Mankiw or higher levels)

And Basic knowledge in Econometrics

1.2 Textbooks and Reading Materials

There is no required textbook for this course. Mostly, we will be based on lectures and papers. See the following course schedule for more details.

2. Learning Outcomes

2.1 Intended Learning Outcomes

Learning Goals	Objectives	Assessment (YES with details or NO)
1. Our graduates will be effective communicators.	1.1. Our students will produce quality business and research-oriented documents.	Problem sets Term paper
	1.2. Students are able to professionally present their ideas and also logically explain and defend their argument.	Presentation
2. Our graduates will be skilled in team work and leadership.	2.1. Students will be able to lead and participate in group for projects, discussion, and presentation.	Presentation Participation and class discussion
	2.2. Students will be able to apply leadership theories and related skills.	Presentation
5. Our graduates will be skilled in problem-solving and critical thinking.	5.1. Our students will have a good understanding of fundamental theories in their fields.	Lectures and Presentation
	5.2. Our students will be prepared to face problems in various business settings and find solutions.	Problem sets Presentation
	5.3. Our students will demonstrate competency in critical thinking.	Problem sets Presentation

2.2 Course specific objectives

See the Course overview for more details.

2.3 Assessment/Grading Details

Assessment component	Weights and Evaluations
Class Participation	10% of final grading;
Class Discussions	10% of final grading; You are strongly encouraged to discuss and comment in the class.
Homework: including Problem sets and paper reading reports	50% of final grading; Teamwork and group discussion are encouraged. Students should submit their own, separate solutions. Home works will be graded by recognizing students' efforts and learning process.
Class Presentation	30% of final grading; Choose from the listed papers (see below) and/or any paper not listed but should send it to me and have my review and permission first.

More details for Class Presentation:

Evaluation will mainly be based on clarity of the presentation: what's new in this paper? Why is it important to the literature? What are the data sets, methods, and the main message in this paper? You are free to choose your classmates and form a team (ideally, less than 3 (including 3) students for a team).

2.4 Academic Honesty and Plagiarism

It is important for a student's effort and credit to be recognized through class assessment. Credits earned for a student work due to efforts done by others are clearly unfair. Deliberate dishonesty is considered academic misconducts, which include plagiarism; cheating on assignments or examinations; engaging in unauthorized collaboration on academic work; taking, acquiring, or using test materials without faculty permission; submitting false or incomplete records of academic achievement; acting alone or in cooperation with another to falsify records or to obtain dishonestly grades, honors, awards, or professional endorsement; or altering, forging, or misusing a University academic record; or fabricating or falsifying of data, research procedures, or data analysis.

All assessments are subject to academic misconduct check. Misconduct check may include reproducing the assessment, providing a copy to another member of faculty, and/or communicate a copy of this assignment to the PHBS Discipline Committee. A suspected plagiarized document/assignment submitted to a plagiarism checking service may be kept in its database for future reference purpose.

Where violation is suspected, penalties will be implemented. The penalties for academic misconduct may include: deduction of honour points, a mark of zero on the assessment, a fail grade for the whole course, and reference of the matter to the Peking University Registrar.

For more information of plagiarism, please refer to *PHBS Student Handbook*.

3. Topics, Teaching and Assessment Schedule

Time	Class Coverage
Week 1-2	<p>Course introduction/Administration</p> <p>Review/Introduction on Theory for Households' consumption and saving: (Reference: Romer Ch. 8)</p> <ul style="list-style-type: none"> ➤ Permanent income hypothesis ➤ With uncertainty and different preferences ➤ With credit constraint and income shocks ➤ A Two-period model of consumption and saving, with idiosyncratic income shocks and credit constraint. Algorithms and Numerical solutions (Matlab, or any other software for numerical computation).
Week 3-4	<p>Empirical studies on Households' consumption and saving</p> <ul style="list-style-type: none"> ➤ Consumers React to Anticipated Income Changes; Hsieh (2003, AER) ➤ Do Liquidity Constraints and Interest Rates Matter for Consumer Behavior?
